# KBPORT™ RECORDING & DEBRIEFING

## ETC FusionHD™

ETC FusionHD™ makes it easy to capture the data of Gaumard®, Laerdal™, Simulaids, and CAE™ manikins live, in real-time, without the need to import files after. ETC Fusion HD™ is a web-based recorder with live video streaming and instantaneous debriefing from anywhere.

The newly redesigned ETC FusionHD™ interface is easy to manage and navigate. Collapsible menus and expandable video inputs make the interface customizable to user preferences. The redesigned file library allows for easy navigation through saved videos. ETC FusionHD™ records in high-definition, resulting in crisp images for detailed video debriefing.

**Extend the power of your ETC FusionHD™ recording and debriefing system with our new, Version 6.5 Expansion Modules\*.**

# Features

## Version 6.5

From the biometric data collection of BioFusion™ to the streamlined debriefing capability of Fusion Power Search™, Version 6.5 Expansion Modules take simulation-based education to a new level.

### BioFusion™

BioFusion™ collects physiological data, from devices measuring it, and displays that data in real time. Flags and events are tagged for changes in biometric data allowing educators to know exactly where a learner needs to improve their focus. KbPort™ will work with you to capture and measure the biometric data that you choose.

## Fusion Kiosk™

Protect the privacy of your learners and prepare them for evolving technology in hospital settings using KbPort™ Fusion Kiosk™. Fusion Kiosk™ provides educators the choice of seven different authentication methods in which a student can log into a session.

## Fusion Tracker™

### Identify Key Simulation Subjects

Educators are now able to name, search, and follow faces and objects included in the prepackaged medical object library for the most efficient, targeted debriefing.

## Remote Access

### Remotely Internet Accessible

FusionHD™ Version 6.5 is Internet accessible, remotely, so educators can access videos to review and grade from anywhere.

## Refined User Interface

### Fusion Dashboard

Version 6.5 presents a newly designed icon-based splash page for quick access to recording, playback, WorkFlow™ and other KbPort™ features and services.

### Control Center

Admins can now manage and view the status of all devices on their network. The new device import feature makes it easy for installation teams to import new devices with their specified settings.

## Fusion Power Search™

### Image Search

FusionHD™ Version 6.5 Fusion Power Search™ features an extensive image searching toolkit from a prepackaged medical object library.

### Facial Recognition

Quickly and easily find videos containing specific users by facial recognition, allowing for the most efficient video debriefing available.

**KbPort™ is proud to launch our most advanced recording and debriefing system yet.**
